

MySQL

DOCS_

Add MySQL to Path

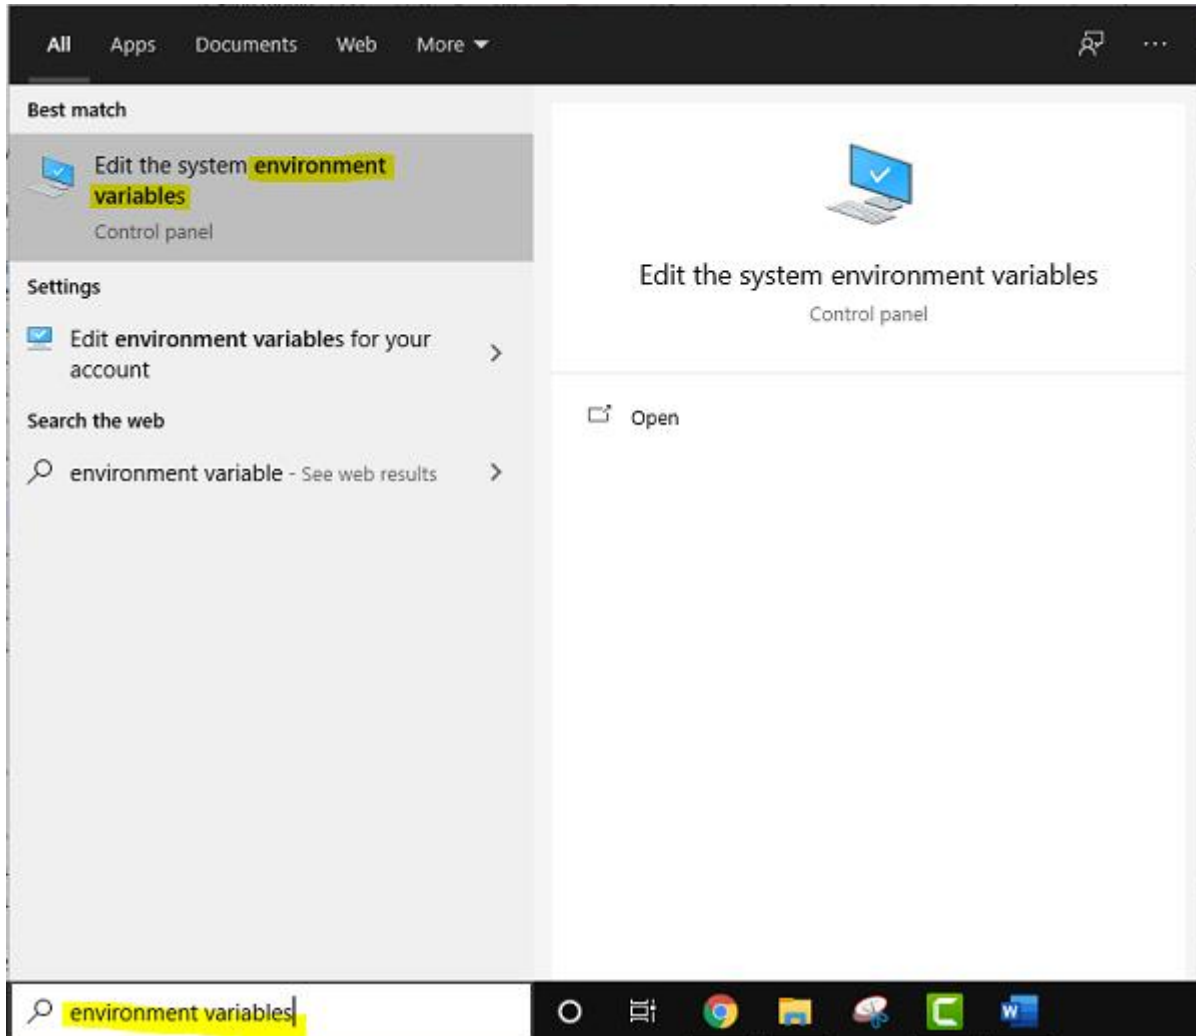

Add MySQL to Path

Below are the steps to add MySQL to path –

Step1 – Locate the mysql.exe file. We found in the following location –

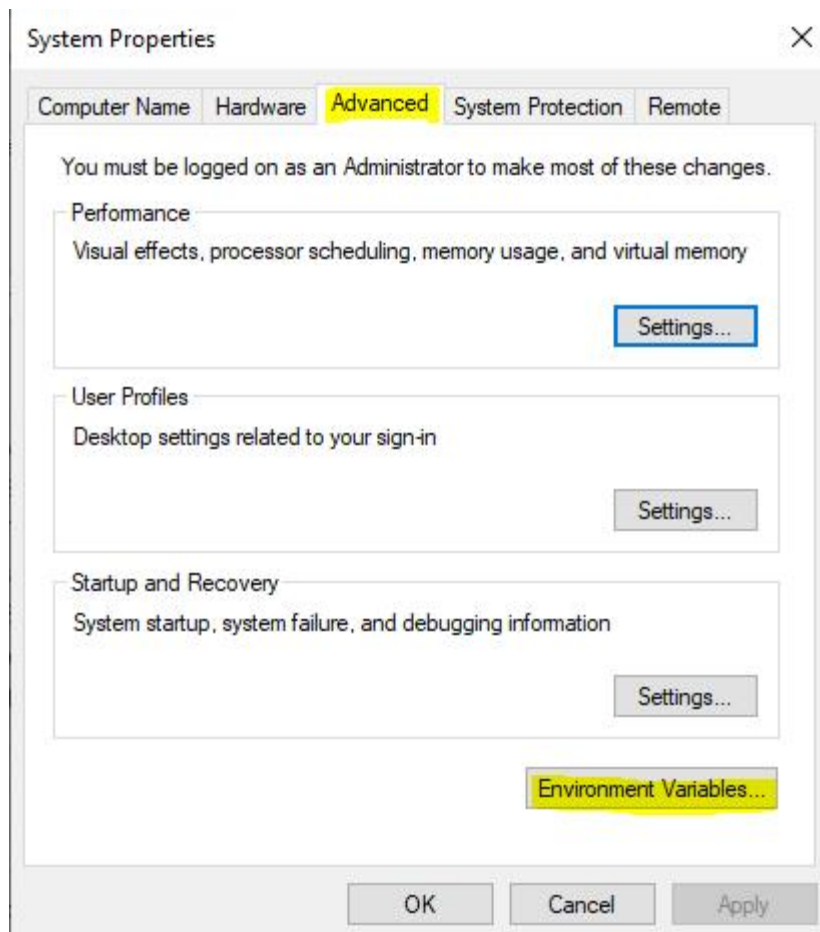

C:\Program Files\MySQL\MySQL Server 8.0\bin

Step 2 – Press Start and type “Environment Variables”. Click –

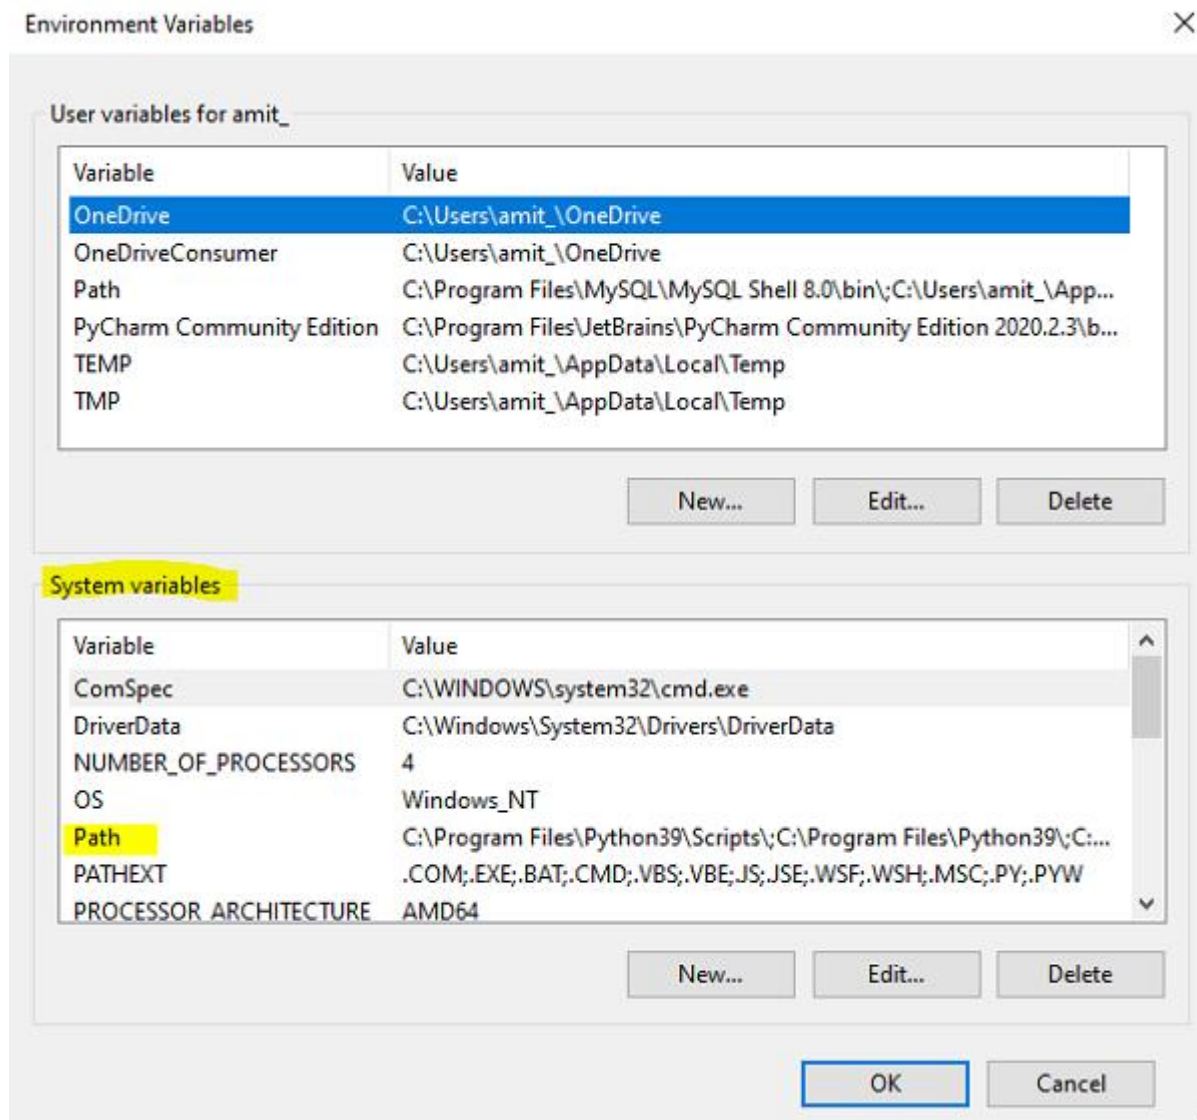

Step 3 – Under ‘Advanced’, click on ‘Environment Variables’ –

Add MySQL to Path

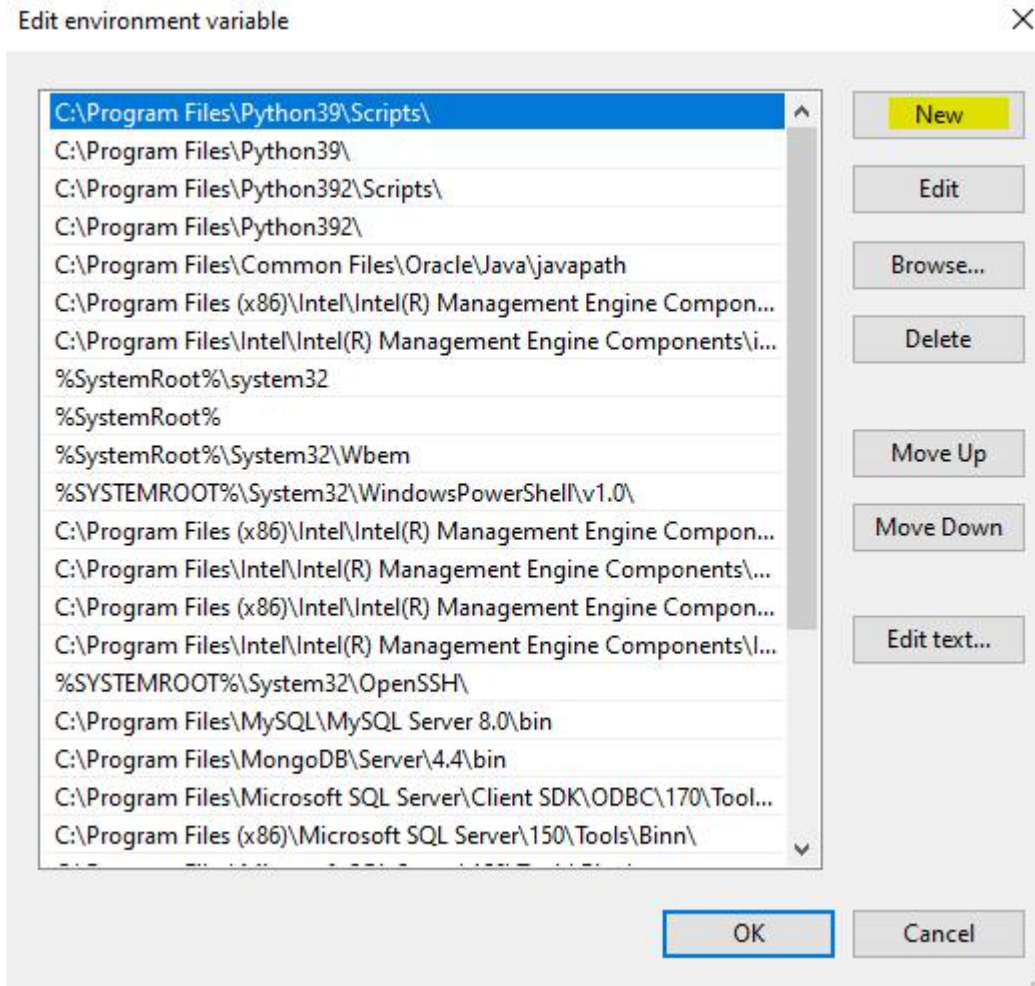

Step 4 – Locate the 'System variables' and double-click on "Path":

Add MySQL to Path

Step 5 – Click on “New” –

Add MySQL to Path

Add the same path and click OK –

C:\Program Files\MySQL\MySQL Server 8.0\bin

The new PATH value should be available to any new command shell the user opens now. This will allow the user to invoke any MySQL executable program by typing its name at the DOS prompt from any directory on the system.
